[LinkedIn](#) · [Portfolio](#)

10+ production apps shipped (Play Store & App Store) · Multi-tenant SaaS architect · RN ↔ Kotlin native bridge · Real-time & AI/voice integrations

PROFESSIONAL SUMMARY

Full-Stack Mobile Engineer with 2+ years of experience (full-time roles plus a MERN internship) shipping cross-platform React Native and native Android (Kotlin) apps to the Google Play Store and Apple App Store, plus hands-on NestJS / Node.js and MERN backend development. At Edysor.ai I work across the stack — from Kotlin native modules and React Native UI to multi-tenant SaaS APIs, real-time WebSocket systems, BullMQ job queues, PostgreSQL/Prisma data models, and AWS deployment. Experienced in offline-first architecture, AI/voice integrations, and multi-gateway payments (Stripe, Razorpay, PayPal, Coinbase). MCA graduate (2026).

TECHNICAL SKILLS

Mobile: React Native, Kotlin, TypeScript, JavaScript, Redux Toolkit (RTK Query), redux-persist, React Navigation, Native Modules, Broadcast Receivers, Deep Linking, Offline-first SQLite, i18n

Backend: NestJS, Node.js, Express.js, Fastify, MERN Stack, REST API Design, Microservices, PostgreSQL, MySQL, MongoDB, Prisma ORM, Knex, Redis, BullMQ, WebSocket / Socket.IO, JWT & RBAC, Multi-Tenant Architecture, Swagger/OpenAPI

AI & Integrations: OpenAI, Deepgram, Azure Document Intelligence, Pinecone, WhatsApp Cloud API, ABDM/ABHA, Firebase (FCM), Google Maps SDK, AdMob, Stripe, Razorpay, PayPal, Coinbase

Cloud & DevOps: AWS (S3, EC2, CloudFront), Docker, Nginx, GitHub Actions CI/CD, Let's Encrypt HTTPS

Testing & QA: Jest, React Native Testing Library, Detox (e2e), Supertest (NestJS), Postman, manual device testing

Tools: Android Studio, Xcode, Git, GitHub, Bitbucket, Google Play Console, App Store Connect, Agile/Scrum

PROFESSIONAL EXPERIENCE

Edysor.ai Full-Stack Mobile Engineer

Oct 2025 – Present

Udaipur, Rajasthan · Built and shipped mobile apps and backend platforms across the company's edtech, healthcare, and AI-voice products.

MOBILE — REACT NATIVE & NATIVE ANDROID

Study Abroad Lead Management CRM — Kotlin Native Modules + React Native

- Built core native Android modules in **Kotlin** bridged into React Native via Native Modules/Hooks, and Android **Broadcast Receivers** capturing 100% of inbound/outbound call events with zero missed logs.
- Implemented **offline-first lead management with SQLite** (background sync + conflict resolution for 1,000+ records), a Truecaller-style call overlay, WebSocket live status, and API-based click-to-call.

Student Application App — React Native + TypeScript

- Developed the full student journey — course/destination selection, loan, visa and application submission, document upload, progress timeline — with an **AI chat counselor** for 24/7 guided support.

GORec — AI-Powered Recruitment App — React Native 0.85 / React 19, WebSocket

- Built a conversational AI sourcing app with a **real-time WebSocket pipeline** (auto-reconnect, token auth) streaming AI job and candidate cards to recruiters.
- Engineered a **voice-to-job feature** (Deepgram speech-to-text) extracting structured job criteria from a spoken brief, plus phone+OTP auth, RTK Query state, and one-tap Excel export.

BACKEND — NESTJS / NODE.JS

Clinic Cloud — Healthcare SaaS Backend — NestJS, PostgreSQL, Prisma, Redis, AWS

- Architected a **multi-tenant SaaS backend** for clinics (header-based tenant isolation, RBAC, 27+ modules, 80+ Prisma models) integrating India's **ABDM/ABHA** national health records and Razorpay payments.
- Built **real-time appointment booking** (Socket.IO), a multi-language WhatsApp bot on BullMQ queues, and Dockerized GitHub Actions CI/CD to AWS EC2 with Nginx + HTTPS.

Interview AI — Voice-Interview SaaS Backend — NestJS, Prisma, Redis/BullMQ, OpenAI

- Engineered a **DB-per-tenant SaaS** with per-request tenant routing via AsyncLocalStorage + a Prisma proxy, a control-plane DB, and self-service tenant provisioning (auto migrate + seed).
- Built the AI interview pipeline — voice ingestion, transcript storage, **LLM evaluation/scoring**, OCR (Azure) + Pinecone knowledge base, and automated PDF reports via retryable BullMQ workers.

Edysor Voice — Open API for Batch Calling — *Node.js, TypeScript, Fastify, Microservices, MySQL*

- Designed an **external-facing REST API** (ElevenLabs-style, 23+ endpoints) for programmatic AI voice-calling campaigns, with **API-key auth** at the gateway across a microservices architecture.
- Shipped the **Scheduled Calls** feature end-to-end (timezone-aware dispatch) as a thin wrapper over the existing campaign pipeline, keeping response shapes backward-compatible for SaaS clients.

MetaStart via WebSensor Pvt. Ltd. *React Native Developer (Contract)*

May 2025 – Oct 2025

- **MyFlama (Social, Android + iOS)**: built a reels-style short-video feed with optimized rendering, real-time chat & media sharing, Google Maps live location, AdMob rewarded ads, and Firebase push.
- **EL-Pico (Club Automation, Android + iOS)**: built membership management, event workflows, and real-time room/facility booking with Stripe and Coinbase (crypto) payment gateways.

WebSensor Private Limited *React Native Developer*

Sep 2024 – May 2025

- **Supraa (Grocery Delivery, Android + iOS)**: engineered a full checkout system with discount/GST processing, quick-commerce ordering, geolocation product listings, and real-time order tracking.
- **BigValue (Travel, Android)**: built a flight booking system (one-way/round-trip/multi-city) integrating Thomalex & Riya travel APIs with PayPal and Razorpay.
- **Additional shipped apps**: **Peclick** · **BRPL** & **BYPL** (IND Govt, Android + iOS) · **SoulSpace** · **Real Sampada**.

Marvik Academy for Technical Education *MERN Stack Intern*

Jul 2024 – Aug 2024

- Contributed to full-stack development with the **MERN stack** (MongoDB, Express.js, React.js, Node.js).
- **Weapon Management System (Indian Army)**: designed the backend for weapon inventory, allocation, and reporting.

EDUCATION

Master of Computer Application (MCA) *Rajasthan Technical University (RTU), Kota*

Aug 2024 – May 2026

Bachelor of Computer Application (BCA) *Mohanlal Sukhadia University (MLSU), Udaipur*

Aug 2021 – Jul 2024
