PROFESSIONAL SUMMARY

Full-Stack Mobile Engineer with **2+ years of experience** shipping **10+ production apps** to the Google Play Store and Apple App Store. Expertise in building cross-platform React Native applications with Kotlin Native Modules, and architecting scalable multi-tenant SaaS backends using NestJS, Prisma, PostgreSQL, real-time WebSocket, and AWS.

Proven in delivering end-to-end solutions — from offline-first mobile features and AI/voice integrations (Deepgram + OpenAI) to high-scale backend systems. Strong focus on performance, real-time systems, and multi-gateway payments. MCA Graduate (2026).

PROFESSIONAL EXPERIENCE

Edysor.ai — Full-Stack Mobile Engineer

Udaipur, Rajasthan · Mobile apps & backend platforms across edtech, healthcare, and AI-voice products.

Oct 2025 – Present

MOBILE — REACT NATIVE & NATIVE ANDROID

Study Abroad Lead Management CRM — Kotlin Native Modules + React Native

- Built **Kotlin Native Modules** bridged with React Native, implementing Android **Broadcast Receivers** that captured 100% of inbound/outbound calls with zero data loss.
- Designed **offline-first architecture** using SQLite with background sync and conflict resolution supporting 1,000+ leads, along with Truecaller-style call overlay, WebSocket live updates, and click-to-call functionality.

Student Application App — React Native + TypeScript

- Developed the full Student Application App covering the complete user journey (course selection, loan, visa, document upload, progress tracking) with an **AI chat counselor**.

GOREC — AI-Powered Recruitment App — React Native 0.85, WebSocket, RTK Query

- Built a **real-time conversational AI app** using React Native 0.85, WebSocket (auto-reconnect, token auth), and RTK Query for streaming AI job/candidate cards.
- Engineered a **voice-to-job feature** using Deepgram speech-to-text to extract structured criteria from spoken briefs.

BACKEND — NESTJS / NODE.JS

Clinic Cloud — Healthcare SaaS — NestJS, Prisma, PostgreSQL, Redis, AWS

- Architected a **multi-tenant SaaS backend** (header-based isolation, RBAC, 80+ Prisma models) serving **[N]+ clinics** from a single deployment, integrating India's **ABDM/ABHA** health records + Razorpay payments.
- Built **real-time appointment booking** (Socket.IO) and a multi-language WhatsApp bot on BullMQ queues; Redis caching cut repeat API latency by **~[X]%**. Deployed on AWS EC2 via Docker + GitHub Actions CI/CD.

Interview AI — Voice Interview SaaS — NestJS, Prisma, Redis/BullMQ, OpenAI

- Designed a **DB-per-tenant architecture** (AsyncLocalStorage + Prisma proxy) with automated provisioning + migration, cutting new-tenant onboarding to under **[X] minutes**.

- Built an end-to-end AI interview pipeline — audio ingestion → transcription → **LLM evaluation** → Azure OCR → Pinecone RAG → automated PDF report — completing in under **[X] seconds** via retryable BullMQ workers.

Edysor Voice — Open API for Batch Calling — *Node.js, TypeScript, Microservices*

- Designed an **ElevenLabs-style REST API** (23+ endpoints) for programmatic AI voice campaigns with **API-key authentication** across microservices.
- Implemented a timezone-aware **Scheduled Calls** feature while maintaining backward compatibility.

MetaStart via WebSensor Pvt. Ltd. — *React Native Developer (Contract)* May 2025 – Oct 2025

- **MyFlama (Social App)**: built a reels-style short-video feed with optimized rendering for smooth playback on mid-range devices, real-time chat, Google Maps live location tracking, AdMob ads, and Firebase push notifications.
- **EL-Pico (Club Automation)**: developed membership management, event workflows, and a real-time booking system with **Stripe & Coinbase** (crypto) payments.

WebSensor Private Limited — *React Native Developer* Sep 2024 – May 2025

- **Supraa (Grocery Delivery)**: engineered a full checkout system with discount/GST calculation, quick-commerce ordering, geolocation-based listings, and real-time order tracking.
- **BigValue (Travel App)**: built a flight booking module (one-way / round-trip / multi-city) integrating third-party travel APIs with PayPal and Razorpay.
- **Additional shipped apps**: **Peclick · BRPL & BYPL** (Govt) · **SoulSpace · Real Sampada**.

Marvik Academy for Technical Education — *MERN Stack Intern* Jul 2024 – Aug 2024

- Developed the backend for a **Weapon Management System (Indian Army)** using the **MERN stack** for inventory, allocation, and reporting.

 CORE STRENGTHS

- **End-to-end ownership** — Kotlin native modules → React Native UI → NestJS / Node APIs → PostgreSQL / Prisma → AWS.
- **Multi-tenant SaaS architecture** — shared-DB and DB-per-tenant systems with isolation, RBAC, queues, and automated provisioning.
- **Real-time & offline-first systems** — WebSocket / Socket.IO and offline SQLite with background sync & conflict resolution.
- **AI & voice integrations** — OpenAI, Deepgram, and Pinecone for AI sourcing, voice interviews, and in-app assistants.
- **Proven delivery** — 10+ production apps shipped to the Google Play Store & Apple App Store.

 EDUCATION

Master of Computer Applications (MCA) Aug 2024 – May 2026
Rajasthan Technical University (RTU), Kota

Bachelor of Computer Applications (BCA) Aug 2021 – Jul 2024
Mohanlal Sukhadia University (MLSU), Udaipur
